Portfolio Web Site User Stories

Goal: Build a four-section portfolio webpage that follows HTML & CSS best practices

Technologies: HTML, CSS

Extra Resources: https://themetrust.com/most-important-features-for-portfolio-sites/

                            https://collegeinfogeek.com/personal-website-examples/

Hosting: When creating your GitHub repository for this project, be sure to:

1. Name the repo "*yourgithubusername*.github.io" (ex., If your GitHub username is "AaronRodgers12," your repo should be named "AaronRodgers12.github.io")
2. Name your homepage 'index.html'.

If you do this correctly, when anyone visits that address (*yourgithubusername*.github.io), it will take them to the index.html page included in your repo!

Project Points: 60

Weighted Total out of 10 Course Points

User Stories:

(5 Points) As a web developer, I want to make a *simple wireframe* for my website so that my portfolio site has a design to follow. **Be sure to include this file in your repo** (i.e., photo of a pen + paper sketch or a file from a wireframing tool like Adobe XD).

(2.5 Points) As a web developer, I want my page to be saved as 'index.html'

(5 Points) As a web developer, I want to build a 'home' section.

(5 Points) As a web developer, I want to build an 'about me' section.

(5 Points) As a web developer, I want to build a 'projects' section.

(5 Points) As a web developer, I want to build a 'contact' section.

(10 Points) As a web developer, I want to have an *external* CSS stylesheet that consists of a variety of styles

(5 Points) As a web developer, I want to have *high-quality images*, including an image of myself on my 'about me' page.

(7.5 Points) As a web developer, I want to have *project placeholders* (title, description, image, etc.) for any future projects that will be placed on my 'projects' page.

(10 Points) As a web developer, I want to produce *high-quality, original content* so that any text written on my portfolio site is engaging and without spelling and grammar mistakes.

Bonus:

(5 Points) As a web developer, I want my web page to be mobile responsive.
